- Double junction reference extends sensor life and protects against poisoning ions
- Durable crack resistant low ionic glass enhances performance and increased reliability
- Operates in sub-zero temperatures down to 14°F (-10°C)
- Advanced electronic diagnostics provides excellent repeatability and reliability

Sand Core

Special High Purity

- O Temperature Compensated
- Solid Nexus[®] Reference Barrier
- No Preamp Required
- High Accuracy
- Quick Response Time
- ✓ ¾" NPT Connection
- PP or PPS Body Materials
- RS 485 Modbus Communication

Extended Rugged Sensor for low conductivity ultra-pure H₂O applications

Ultra fast response times coupled with high accuracy. The ProCon® P14P offers long-term reliability in low ionic applications.

The Nexus® reference eliminates reference poisoning and extends life expectancy. The versatile P14P sensor transmitter provides complete confidence in high purity water applications.

The double junction coupled with the solid Nexus[®] KCl infused reference makes the P14P pH sensor an excellent choice for high purity H₂O process media applications.

All measurement functions are combined in one compact body — measuring electrode, temperature sensor and an inner reference chamber.

The 2-wire 4-20mA, 4-wire or 4-20mA + RS485 output options simplify calibration and communication with remote displays and controllers.

Model Selection

P14P — Ultra-pure H₂O pH Sensor						
Part Number	Material	Туре	Connection			
P14P-P-D-1-B-M	PP	4-wire (for ProCon® display)	Bulb	M12		
P14P-P-M-1-B-M	PP	4-20mA (2-wire, std)	Bulb	M12		
P14P-P-S-1-B-M	PP	RS485 + 4-20mA	Bulb	M12		

Last digit: "M" for M12 Connection (std), "F" Flying Lead - consult factory

ProCon[®] — P14P with NEXUS[®] pH Sensor Transmitter

Smart Sensor Technology

Advanced electronic circuity stores pH data for automatic sensor recognition and trouble-free calibration when connected to the ProCon® Controller.

Outputs

1. 4-20mA 2-Wire 2. 4-20mA + RS485

Both the measuring and reference electrodes are encapsulated within the non-porous advanced KCl infused polymer known as Nexus[®].

Less Calibration and Maintenance

Most sensors require on-going recalibration and are prone to premature failure due to what is known as gradient drift, or sensor drift.

The Nexus[®] series is a solid reference material. Poisoning or leaching of the reference electrolyte that occurs in standard sensor is greatly reduced.

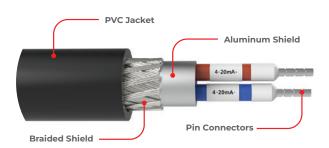

The Nexus reference helps to eliminate the need for ongoing maintenance or cleaning requirement due to fouling or film build up removal which occurs with many process applications with traditional pH sensors.

Faster Response — Longer Lasting

The solid Nexus® reference provides for faster response time to changing pH values since there is no requirement for a junction.

⊘ No Costly Preamps Required

Oirect 4-20mA & RS485 Outputs

4-20mA+RS485 Direct Sensor Output

Advanced electronic circuity stores pH data for automatic sensor recognition and trouble-free calibration when connected to the ProCon[®] Controller

Enhanced chip technology allows for remote calibration as well as diagnostic data Data analysis and direct 4-20mA signal or RS485 Digital outputs

Integral Preamp

2-wire 4-20mA + RS485 Modbus direct sensor to controller connection eliminates the requirement for a preamp.

Sand Core

Digital output removes the need for high impedance cable — longer distances without compromising accuracy.

Nexus[®] technology

- Solid KCl infused reference junction
- Eliminates reference poisoning/leaching
- Extended life expectancy

Specifications

Measurement Range				
На	0 – 12			
Output Signal — No Preamp Required				
2 Wire Loop Powered 4-20mA + RS 485 Direct Sensor Output				
Accuracy				
7.00 ± 0.25				
Operating Temperature				
14 to 176°F -10 to 80°C Automatic Temperature Compensation				
Maximum Pressure				
150 Psi at 140°F (60°C) — See Pressure	vs. Temp Graph			
Design				
Sensor body	PP Polypropylene (std) Ryton® PPS			
Reference System	3.3 Mol Ag / AgCl / KCl Double Junction			
pH electrode	Blue Glass			
Reference	Solid Nexus®			
Connection	3/4" NPT			
Measuring Electrode Resistance	< 800 MΩ			
mpedance Range $102 - 675 M\Omega$				
Temperature Compensation/Output- 4-20 + RS485 Model				
Pt-1000 (Std)				
Pt-100				

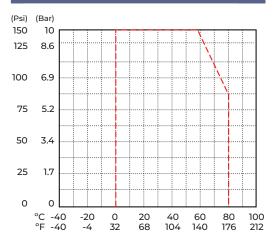

pH Sensor Transmitter

Temperature Control

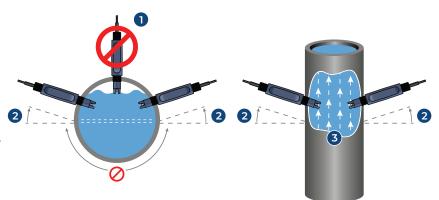

Temperature vs. Pressure

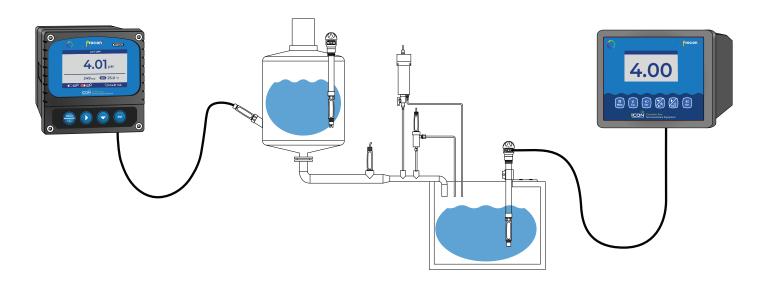

In-line Mounting

- 1. Avoid vertical installation. (air may be present)
- 2. Optimum installation 15° above horizontal.
- Process liquid should flow upward. (for downward flow ensure backpressure is present in order to avoid air within pipe)

Typical Application

ProCon[®] — P14P with NEXUS[®] pH Sensor Transmitter

CORRECTIONS CONTROLS

Cable Options

The ProCon[®] series offer complete flexibility of cabling options throughout the range. All cables are shielded against spurious EMF and are potted inside the sensor ensuring environmental protection.

The standard cable length for most sensors is 5m (15 ft). However, cables can be supplied as any continuous size up to 20m (66 ft).

Standard accessories include jsubmersion couplers, typically used with extension cables for direct connection to the ProCon[®] Controllers.

Extension cables also permit distances between sensor and instrument of up to 30 m (100 ft.) without external preamplifier.

M12 Quick Connection

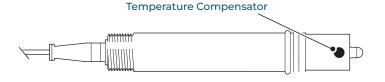

Temperature compensation

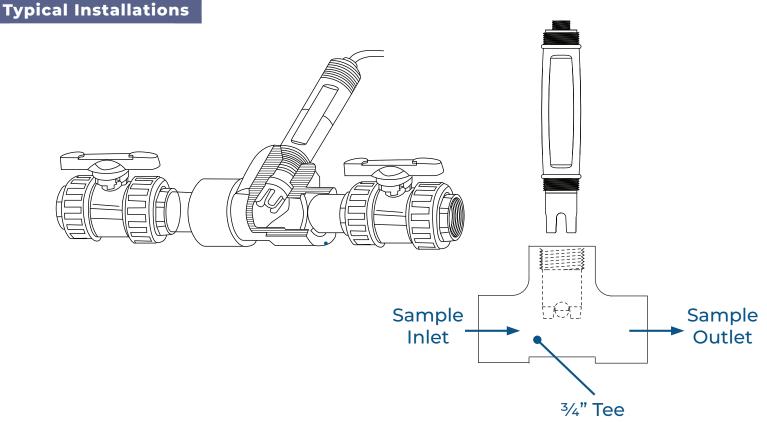

The temperature compensator enables sensor to adjust for temperature effects on the glass pH electrode output.

The sensor can also use this measurement to compensate for solution pH temperature effects.

Sensors can be ordered with integral temperature sensors. The integral temperature compensator is available in two outputs — Pt 1000 (std) and Pt 100.

* Temperature outputs on 4 and 6 wire versions only.
