VA 525 - Compact inline flow sensor for air and nitrogen

No inlet section necessary – integrated flow straightener – optional pressure sensor

The newly developed VA 525 combines modern digital interfaces for connection to an energy monitoring system with a small, compact design. The VA 525 is always used when many machines (compressed air consumers) are to be integrated into an energy monitoring network.

Readout values in the display can be rotated by 180°, e.g. for overhead installation

Display shows 2 values at the same time:

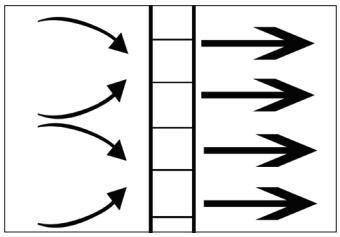

- Present flow in m³/h, l/min,...
- Total consumption (counter reading) in m³, l, kg
- Temperature measurement
- **Optional**: Pressure measurement

Screw-in thread:

Easy installation into the existing pipe due to integrated measuring section (suitable for 1/4", 1/2", 3/4", 1", 1 1/4", 1 1/2" or 2" lines)

Advantages at a glance:

- Compact, small design - for use in machines, behind maintenance unit on the end user
- Optionally with conventional analogueue signals (4…20 mA and pulse) or digital interfaces such as Modbus-RTU, Ethernet (also PoE), M-Bus
- All interfaces are freely programmable via the display

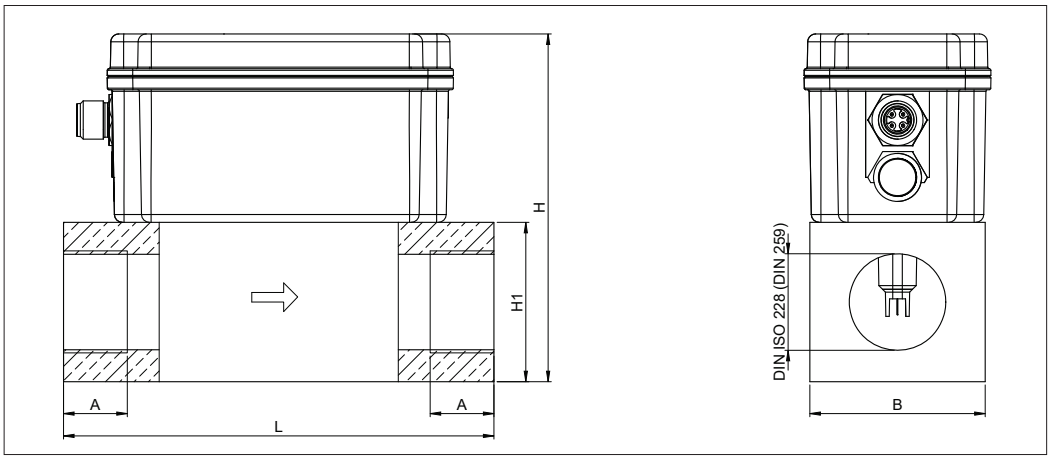

Integrated flow straightener - no inlet section necessary

With a key stroke:

- Reset counter reading
- Select units
- Parameterise interfaces
